CLIPER

CERÂMICA

A cerâmica plana, serve desde tempos imemoriais, para recriar ambientes esteticamente agradáveis, e igualmente, transpor para os nossos lares alguma da beleza inexcedível que encontramos na natureza.

Neste catálogo, que agora começa a descobrir, vai encontrar peças de elevado valor estético concebidas com atenção e desvelo, para lhe dar imensas opções de cobertura dos pavimentos e paredes da sua habitação, escritório, ou espaço comercial sempre com a preocupação de lhe proporcionar espaços de tranquilidade, bem-estar e beleza.

Aprecie, desfrute, deixe-se envolver pelo mundo mágico da beleza, no seu estado mais puro.

CLIPER Cerâmica, S.A.

Since immemorial times, ceramic tiles have been used to re-create aesthetically pleasing environments, so as to transpose to our homes some of the unsurpassed beauty that we find in nature.

In this catalogue, which now you begin to discover, you will find pieces of high aesthetic value, designed with attention and care, in order to give you enormous options for covering the walls and floors of your home, your office or commercial spaces, always with the intent to provide you with tranquility, wellness and beauty spaces.

Come and enjoy, let you soak up by the magical world of pure beauty.

CLIPER Cerâmica, S.A.

Desde tiempos inmemoriales hemos utilizado la cerámica plana para la realización de ambientes acogedores, así como la recreación en nuestras estancias de elementos extremadamente bellos que la naturaleza nos ofrece.

En este catálogo que ahora comienza a descubrir, va a encontrar piezas de elevado valor artístico, elaboradas con delicadeza y esmero. Pavimentos y revestimientos, que le proporcionaran innumerables soluciones creativas para hogares, oficinas y espacios comerciales.

Nuestro único objetivo es poner en sus manos espacios de tranquilidad, bienestar y belleza.

Contemple, disfrute, déjese llevar por el mágico mundo de la belleza, en estado puro.

CLIPER Cerâmica, S.A.

Le carrelage est utilisé, depuis des temps ancestraux, pour créer des ambiances agréables. Il nous permet également d'apporter dans nos foyers, une partie de la beauté que nous trouvons dans la nature.

Dans ce catalogue, que vous commencez maintenant à feuilleter, vous allez découvrir, de magnifiques carreaux, conçus avec attention et grand soin, qui vous donneront d'immenses possibilités de décoration pour les sols comme pour les murs, de votre habitation, de votre bureau ou de votre espace commercial.

Avec toujours le désir, de vous aider à concevoir, de superbes ambiances qui vous apporteront sérénité, bien être et tranquillité.

Savourez, appréciez, laissez-vous envahir, par la magie de la beauté dans son état le plus pur.

CLIPER Cerâmica, S.A.

Seit der Antike, verwendet man Fliesen um ästhetisch ansprechende Atmosphäre zu schaffen.

Diese erlauben uns einige von unübertroffener Schönheit, dass wir in der Natur finden, in unsere Häuser rein zu bringen.

In diesem Katalog, den Sie jetzt beginnen zu entdecken, werden Sie Fliesen mit hohem ästhetischem Wert finden, die mit Aufmerksamkeit und Sorgfalt konzipiert wurden, und Ihnen viele Optionen, um die Böden und Wände Ihrer Wohnung, Büro oder Gewerbefläche zu decken.

Immer mit der Absicht, Ihnen Räume mit Ruhe, Wohlbefindens (ou Wellness und Beauty) zu bieten.

Genießen Sie es, lassen Sie sich von der Magie der Schönheit in ihrer reinsten Zustand überrascht werden.

CLIPER Cerâmica, S.A.

Cada espaço é único, pessoal e personalizável.
Da nostalgia à alegria da cor, a harmonia do design alia-se à arte urbana.

Each space is unique, personal and customizable.
From nostalgia to the joy of color, the harmony of design meets urban art.

Chaque espace est unique, personnel et personnalisable.
De la nostalgie à la joie des couleurs, l'harmonie du design rencontre l'art urbain.

conseilhos de aplicação e manutenção.

application and maintenance recommendations . conseils de pose et d’entretiens.

certificados.

certificates . certificats.

pt. A correcta colocação do Pavimento e Revestimento Cerâmico não só realça a beleza estética como também pode evitar desprendimento dos mosaicos aplicados ou rotura dos mesmos causados por agentes externos.

1) Durante a aplicação, aconselhamos tirar da paleta 5 a 6 caixas simultaneamente e misturar as peças de modo a obter uma tonalidade homogénea no pavimento. A superfície de colocação deve estar bem nivelada e perfeitamente limpa de pó, gorduras, resto de pinturas que possam causar a má aderência. Estender o cimento cola sobre o suporte com uma régua dentada (pente) com aproximadamente 8 a 10 mm de altura. Colocar os mosaicos sobre o cimento fresco, pressionando as peças, exercendo um pequeno movimento de vaivém para conseguir a maior cobertura do dorso do mosaico, respeitando a junta de dilatação estabelecida. Esperar como mínimo 24 horas desde a finalização da aplicação até ao início do rejuntamento.

2) Aplicar os mosaicos com juntas de dilatação (mínimo 3 e 4 mm) em função do formato e efeito estético pretendido, utilizando para isso, cruzetas de espaçamento. Previsto pelas normas, esta recomendação é indispensável para produtos cerâmicos cozidos a altas temperaturas. Também permite alinhar os mosaicos, uns pelos outros, facilita a limpeza e higiene dos pavimentos. As juntas de dilatação devem estar limpas de fragmentos ou sujidade com uma profundidade uniforme. Para o rejuntamento do Grés Porcelânico, é recomendado humedecer a superfície previamente e aplicar o cimento com uma espátula de borracha

en. The correct application of Floor and Wall Tiles does not only enhance its aesthetic beauty as it can also avoid the loosening of the applied floor tiles or the rupture of the same caused by external agents.

1) During the application, we advise to take 5 to 6 boxes out of the pallet simultaneously and mix the pieces, in order to get a more homogeneous tonality in the pavement.

The placing surface should be well graded and perfectly clean of dust, grease or painting rests that may cause bad adherence. Spread the glue cement over the support with an notched trowel ("handyman" spreader), leaving a layer with 8 to 10 mm height approximately. Place the floor tiles over the fresh cement, pressing and "sea sawing" them to get the largest coverture of the back of the tile, respecting the dilation junction wanted.

2) Dispose the floor tiles by leaving dilation junctions (3 to 4 mm minimum) attending to the format and desired aesthetic effect. For that, it is recommended to use plastic cross tile spacers. Foreseen by the rules, this advice it is essential to ceramic products burn at high temperatures. It allows also aligning the floor tiles one by the others and simplifies the cleaning and hygiene of the pavement. Dilation junctions should be clean of any kind of trash fragments and the depth should be uniform. For Porcelain Tile grouting, it is recommended to gently wet the surface

fr. La pose correcte des Carreaux Sols et de la Faïence, met en valeur la beauté esthétique du produit et peut aussi éviter le décollage de carreaux déjà posés ainsi comme la casse après intervention des agents extérieurs.

1) Pendant l’application (pose):

- La surface de pose doit être bien nivelée et propre (sans poussière, graisse, ou trace de peinture), afin de ne pas empêcher l’adhérence du produit.
- Mélanger les carreaux de 4 ou 5 boîtes en même temps, de façon à obtenir une surface homogène au niveau de tonalité.
- Appliquer la colle sur le support, en utilisant un peigne de 8 à 10 mm de hauteur.
- Presser les carreaux sur la colle, avec une petite pression et un mouvement d’aller- retour pour bien diffuser la colle, en respectant toujours le joint pré établi.
- Attendre au moins 24 heures avant de remplir les joints.

2) Appliquer les carreaux avec un joint de dilatation (minimum de 3-4 mm) en fonction du format et de l’effet esthétique prétendu en utilisant des croisillons prévus dans la norme. Cette utilisation des croisillons est indispensable pour des produits céramiques, soumis pendant le procès de fabrication à des températures très élevées. Ils permettent aussi l’alignement des carreaux ainsi que le nettoyage des sols. Les joints doivent être propres et doivent avoir une profondeur uniforme. Pour le jointoieiment des grès cérame, nous conseillons d’humidifier préalablement la surface et d’ appliquer la colle avec une raclette de

dura, efectuando repetidas passagens em diagonal sobre as juntas, limpando as sobras de cimento com a mesma espátula. Antes de secar, a limpeza deve ser feita com uma esponja fina, escorrida em água limpa. Proteger o pavimento com cartões ou plásticos grossos se a obra não estiver concluída, sendo necessário executar trabalhos posteriores que possam danificar o pavimento aplicado.

3) Em caso de aplicação sobre pavimento existente, para eliminar as diferenças de planaridade (irregularidade de superfície) e favorecer uma boa aderência, é aconselhável lixar a superfície com um disco abrasivo de grão ou colocar uma camada de produto autonivelante.

4) Na pavimentação de grandes superfícies, interiores ou exteriores, é indispensável prever uma junta elástica de dilatação (em todo o seu perímetro e internamente) conforme as prescrições normativas de aplicação.

5) Após a aplicação dos mosaicos, é conveniente proceder à limpeza da superfície aplicada, utilizando detergentes de base ácida para eliminar os resíduos calcários. Para proteger as juntas é importante molhar a superfície antes da aplicação e limpar a água com um pano seco.

6) Para a manutenção quotidiana, utilizar detergentes tradicionais seguindo as recomendações do fabricante. Em presença de manchas difíceis, é importante identificar o tipo de mancha afim de evitar utilizar produtos não adaptados que possam manchar ainda mais os mosaicos.

before spreading the cement with hard rubber grouter, performing repeated diagonal passages over the junctions and cleaning the cement rest with the same grouter. Before it dries, cleaning should be made with a thin sponge, drained in clean water. The pavement should be protected with thick cards or plastics if there will be posterior works that can damage the applied floor.

3) In cases of application over existing pavements, it is recommended to polish the surface with an abrasive disc of thick grain or to put a layer of levelling compound. These actions will eliminate differences of levelness and will promote also better adherence.

4) In great surfaces paving, internal or external, it is essential to predict an elastic dilation junction (in all its perimeter and internally) as stated in standard application prescriptions.

5) After laying the floor tiles it is convenient to clean the applied surface using acid base cleaning products to eliminate calcareous remnants. To protect junctions it is important to wet the surface before the cleaning and, after that, use a dry cloth.

6) To daily maintenance, use the traditional cleaning products by following the recommendations of the manufacturer. When dealing with hard to clean spots, it is important to identify them so that wrong products application can be avoided, what can do even worse.

faïencier en passant plusieurs fois en diagonal sur les joints ainsi que de retirer le surplus de colle avec la même raclette. Avant le séchage, nettoyer avec une éponge fine imprégnée d’eau pure. Si vous avez besoin de travailler dessus, il va falloir protéger le sol avec des cartons ou du plastique dur.

3) Si l’application doit se faire sur un sol céramique déjà existant, il faut d’abord éliminer les différences de hauteur. Afin de favoriser l’adhérence il faut poncer le sol avec des disques ponceurs auto-grippant ou bien appliquer un produit auto nivelant.

4) Pour appliquer sur des grandes surfaces soit à l’intérieur soit à l’extérieur, il faut prévoir un joint élastique de dilatation (dans tous le périmètre et à l’intérieur) selon les normes en vigueur.

5) Après la pose, il est convenable de nettoyer la surface en utilisant des produits de nettoyage à la base acide pour éliminer les résidus calcaires. Pour protéger les joints, il est important d’humidifier la surface et de nettoyer avec un chiffon sec.

6) Pour l’entretien de tous les jours, utiliser des produits de nettoyage traditionnels tous en respectant les instructions du fabricant. Dans le cas de tâches tenaces, il est très important d’identifier le type de tâche afin d’éviter l’utilisation de produits inadéquats. Pour éliminer les tâches de graisse qu’elles soient végétales ou animales, tâches de bière, vin ou café, il est conseillé d’utiliser des produits de nettoyage à base alcaline (soude caustique, potasse). Pour éliminer des dépôts calcaires, du ciment, de la rouille, de l’ encre,

Para eliminar manchas ou outro tipo de sujidade é aconselhado utilizar:

- Para substâncias gordurosas vegetal ou animal, cerveja, vinho, café: Detergentes com base alcalina (soda caustica, potassa).

- Para depósitos calcários, cimento, ferrugem, oxidação, tinta de tinteiro: Detergentes com base ácida (ácido clorídrico, nítrico, sulfúrico, oxálico).

- Para vernizes, tintas, tintas resinosas ou esmalte, óleo, marca de pneu: Solventes (trielina, diluente, águarrás, acetona).

Usar de muita prudência na utilização de ácidos ou de outros produtos químicos concentrados. Seguir atentamente as instruções dos fabricantes indicados nas embalagens.

As excelentes Características Técnicas do Grés Porcelânico, tais como a baixíssima porosidade (absorção de água) que garante a resistência ao gelo, a elevada resistência à flexão e à abrasão, para além da sua beleza estética, permite ser aplicado em interiores e exteriores em zonas residenciais ou serviços, hotéis, centros comerciais, escolas, restaurantes, terraços, etc.

To eliminate spots or other kind of rubbishes it is advised to use:

- To greasy substances (animal or vegetable), beer, wine, coffee: Cleaning products with alkaline basis (caustic soda, potash)

- To calcareous deposits, cement, rust, oxidation, inkpot ink: Cleaning products with acid basis (hydrochloric, nitric, sulphuric or oxalic acid)

- To varnish, resinous or enamel inks, oil or tire marks: Solvents (diluents, essence of turpentine, acetone)

Handle acids and other concentrated chemical products very carefully. Follow closely manufacturers’ instructions indicated in packaging.

The excellent technical characteristics of Porcelain Tile such as extremely low level of water absorption (that insures ice resistance), high resistance to flexion and abrasion, beyond its aesthetic beauty, allows that it can be applied in interiors and exteriors of residential or service areas, hotel, shopping centres, schools, restaurants, terraces, etc

utiliser des produits de nettoyage à base acide (acide chlorhydrique, nitrique, sulfurique, oxalique).

Pour des vernis, des traces de peinture, de la peinture d’origine résineuse, de l’ huile, des tâches de caoutchouc de pneu, utiliser des solvants (triel line, diluant, acétone).

Nous vous rappelons que ces produits très concentrés doivent être utilisés avec précaution. Respecter soigneusement les instructions des fabricants figurant sur les emballages.

Les excellentes caractéristiques techniques du grès cérame (très faible porosité par exemple) , garantissant une énorme résistance au gel, ainsi que la résistance à la flexion et à l’abrasion, sa beauté esthétique, permettent l’application soit à l’intérieur soit à l’extérieur d’appartements, villas, hôtels, restaurants, écoles, centres commerciaux, balcons, etc.
